

Anti-static brush

Static discharge control

Dimensions: 11 m length, 32 mm diameter

Material: 99 % copper

Included in delivery: 2 x 11 m (box)

Functional description:

- placement just above material (ionisation of the air) Ionised air enables neutralisation of charge
- placement on the material (additional discharge to ground)
- resulting in increased power
- most effective without physical contact as not to pick up particles and dust
- mounting via connection clamp and tension spring

Features:

- passive static discharge
- breaking load approx. 10 kg
- excellent price/performance relation
- especially well suited for film winders and unwinders
- at least 90 % discharge as default
- user-friendly and maintenance free
