

Delta E - electric handling device

Lift / Transport

Material: solid steel construction

Load capacity: max. 1,500 kg

Lifting height: max. 3,500 mm

Operation: electr. movability / electro-hydraulic lift

Features:

The Delta E fulfills all requirements for power, ergonomics and safety in the mobility sector and represents the ideal solution for intensive work with load movements in medium and large environments.

Thanks to its special steel profiles, the Delta E enables even better performance mainly and particularly heavy loads.

The extruded duplex mast of the Delta E allows lifting of loads of up to 1,500 kg up to a maximum height of 3,500 mm.
