

ERW-M CP Light RT - Electrical roll turner

Lifting / turning / transporting

material: powder-coated aluminium/steel construction

max. loading capacity: 300 kg

operation: electric or electro-hydraulic

optional: extended column, camera system USB-port ...

Equipment:

The expanding mandrel grips the roll in the sleeve and tensions independently.

The grippers of the expanding mandrel are manually released by a mechanical device.

The lifting and turning of the roll from the vertical to the horizontal position (or vice versa) is done electro-hydraulically.

The ERW-M CP Light is the ultimate counterbalance stacker with which you can work with maximum manoeuvrability even in the tightest work spaces. Thanks to the counterweight, this type of truck does not require typical front support legs. therefore as well as maximum loading for order picking and storage of goods despite storage possible obstacles on the floor. In addition, the absence of support legs on the ground floor allows the load to be approached up to the fork shoulder.

Applications:

- Foil industry
- Textile industry
- Paper industry
- Plastics technology
