

## ERW-M Delta E – electric handling device

### Lift / Turn / Transport

**Material:** solid steel construction

**Load capacity:** 500 kg (depending on model variant and roll dimensions)

**Lifting height:** max. 3,500 mm

**Operation:** electr. movability / electro-hydraulic lift

### Features:

The ERW-M Delta E fulfills all requirements for power, ergonomics and safety in the mobility sector and represents the ideal solution for intensive work with load movements in medium and large environments.

Thanks to its special steel profiles, the ERW-M Delta E enables even better performance mainly and particularly heavy loads.

The extruded duplex mast of the ERW-M Delta E allows loads of up to 500 kg (depending on model variant and roll dimensions) to be lifted to a maximum height of 3,500 mm.
